Team Catilaners - Erica Liang

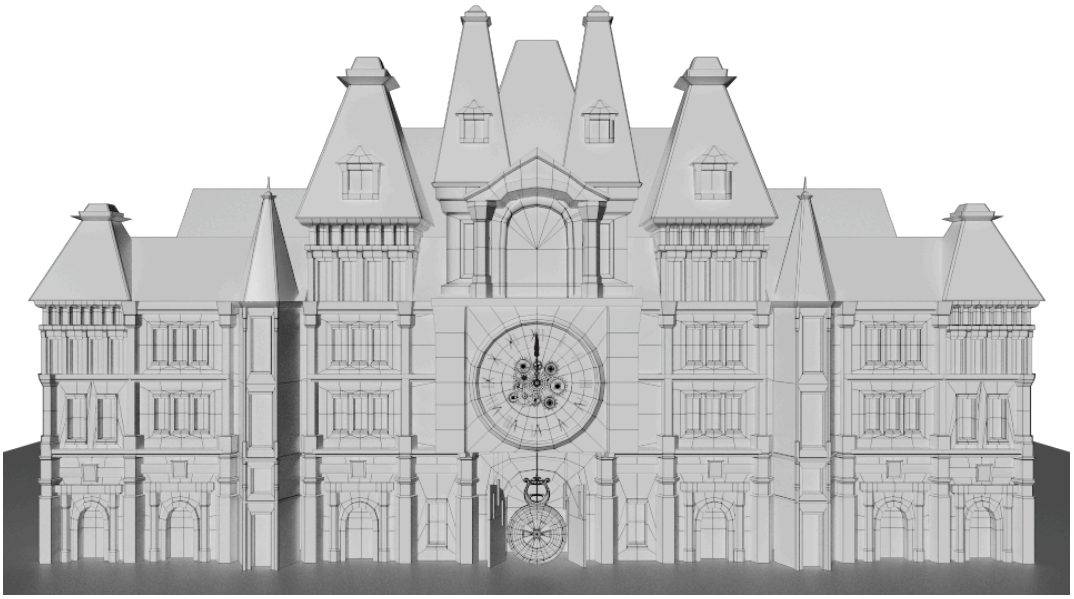

My contributions:

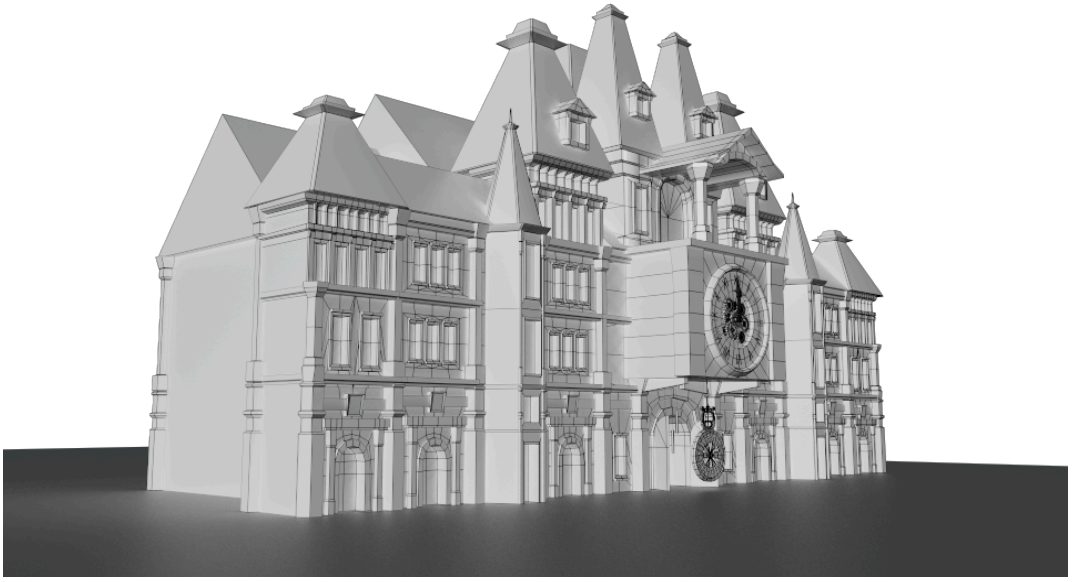

- Helped with putting everything into one scene
- Helped with final art adjustment of the scene (Post Processing, Toning materials to keep consistency of the environment, Lighting, Fog)

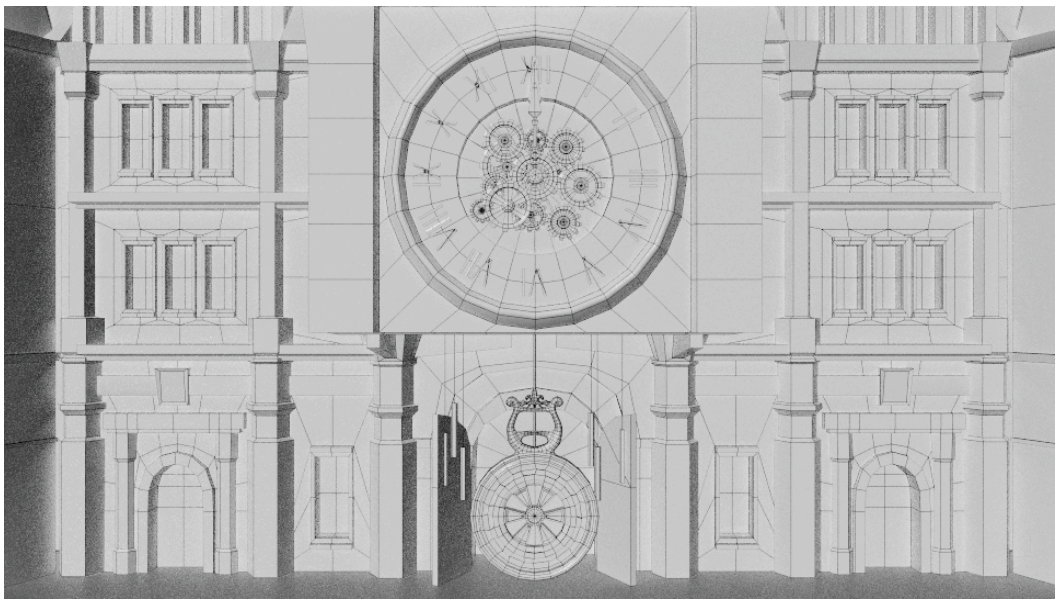

Train Station

- Model + Texture
- BP for pendulums

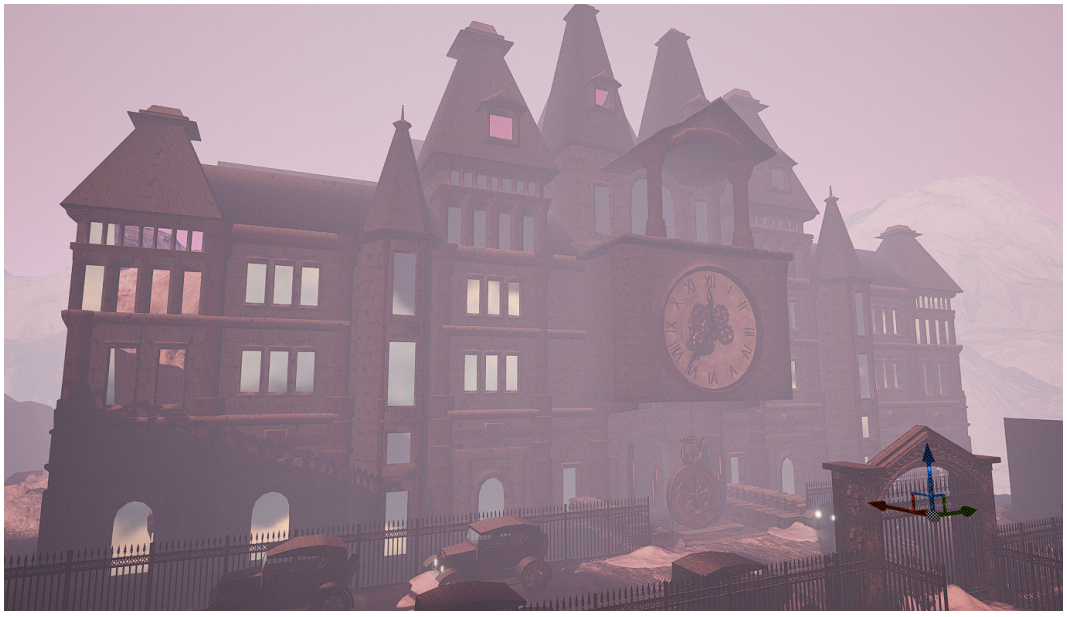

WireFrame:

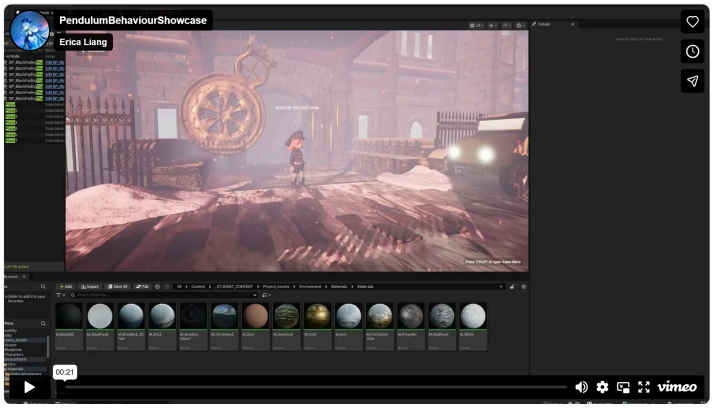

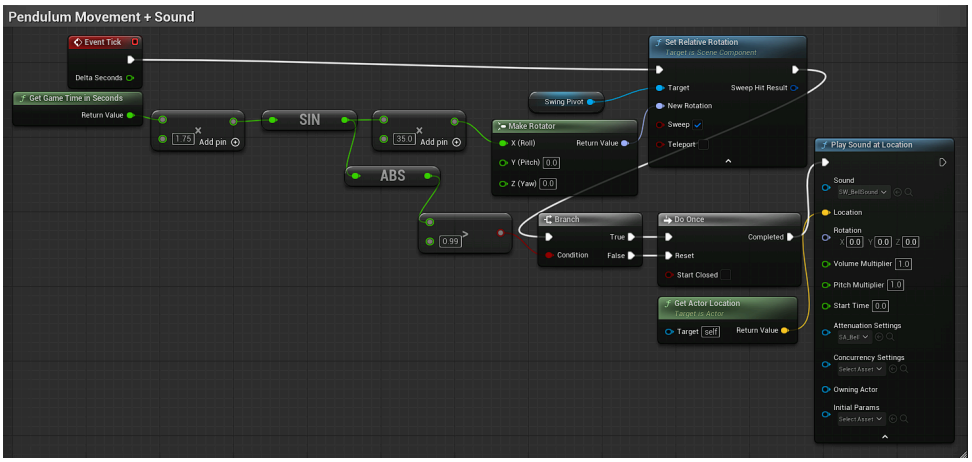

In Game Render:

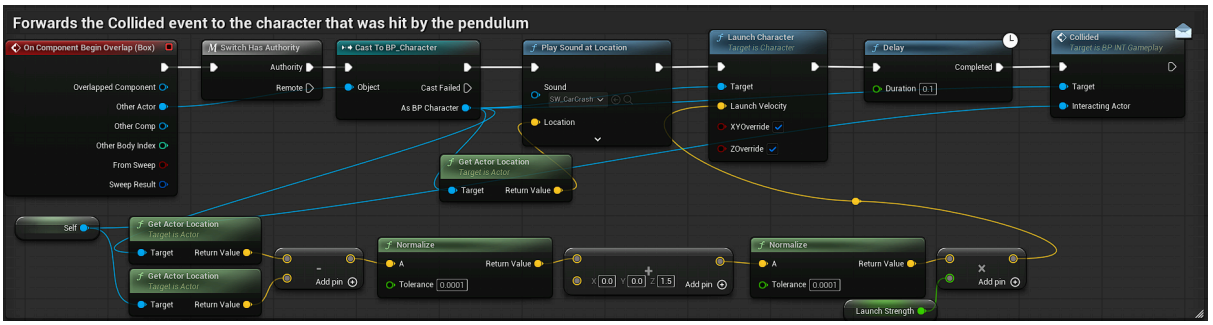

BP Pendulum:

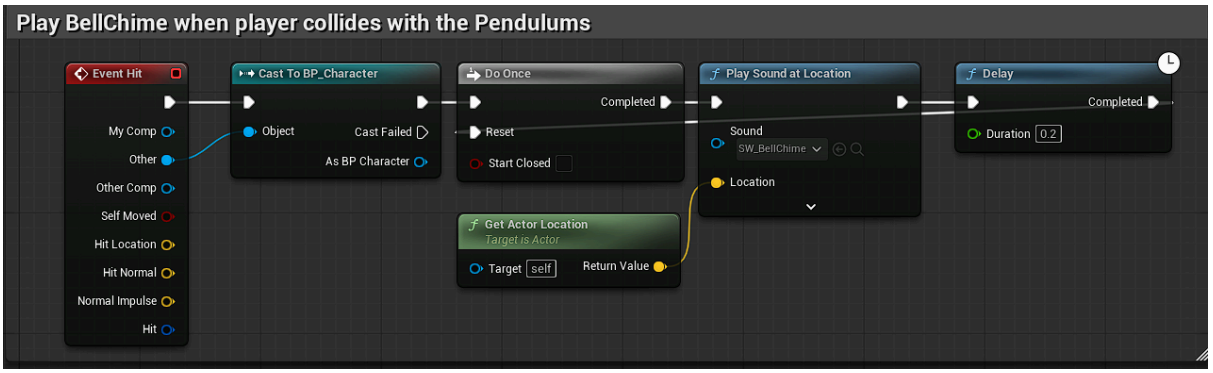

Showcase Video

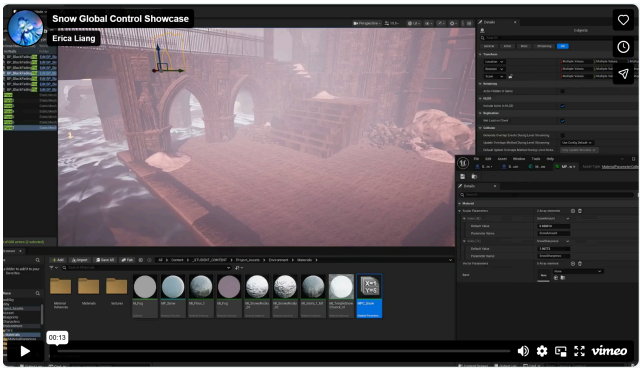

Mini Pendulum:

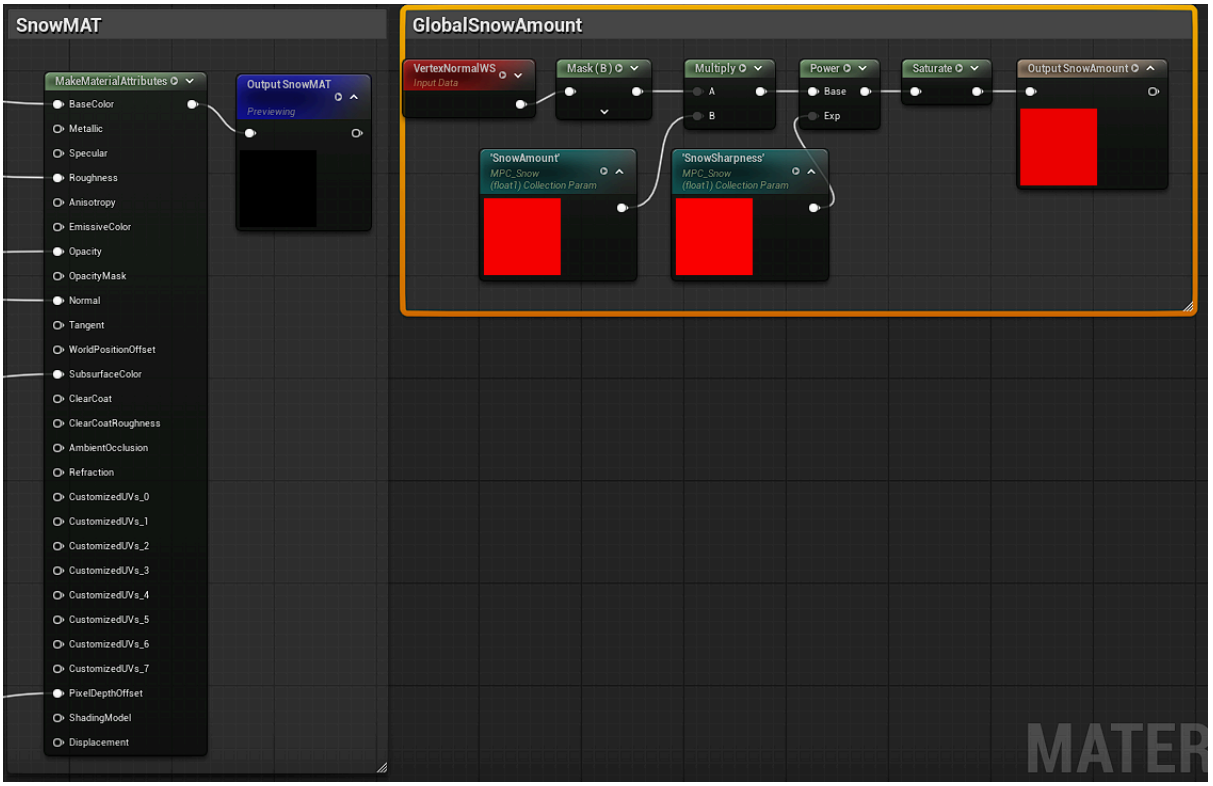

Global MPC Snow Control

- a material function and MPC that can globally control and blend snow to any other materials in the scene

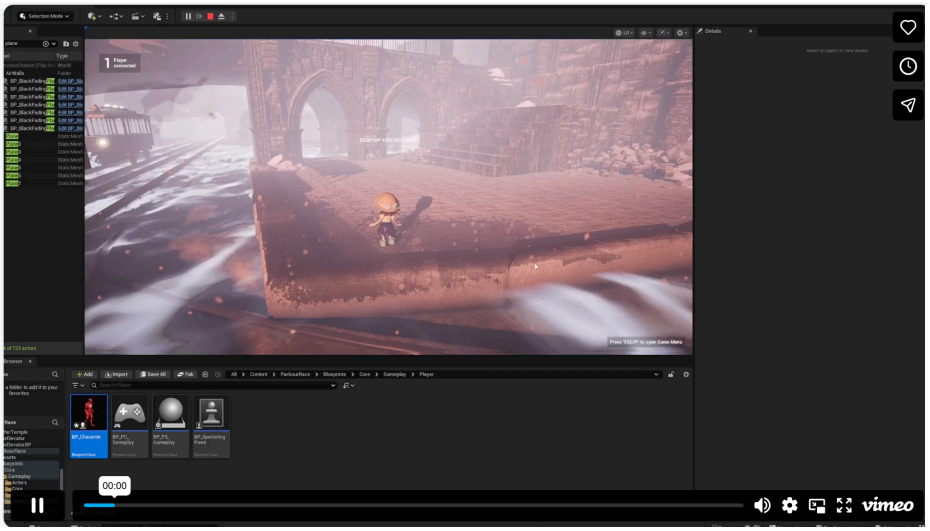

Showcase Video

(Snow Material was from FAB)

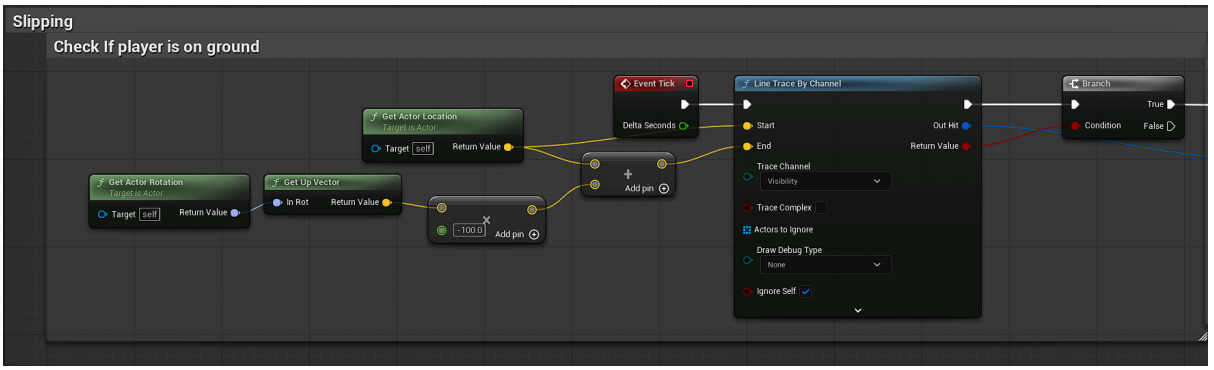

Slipping Snow

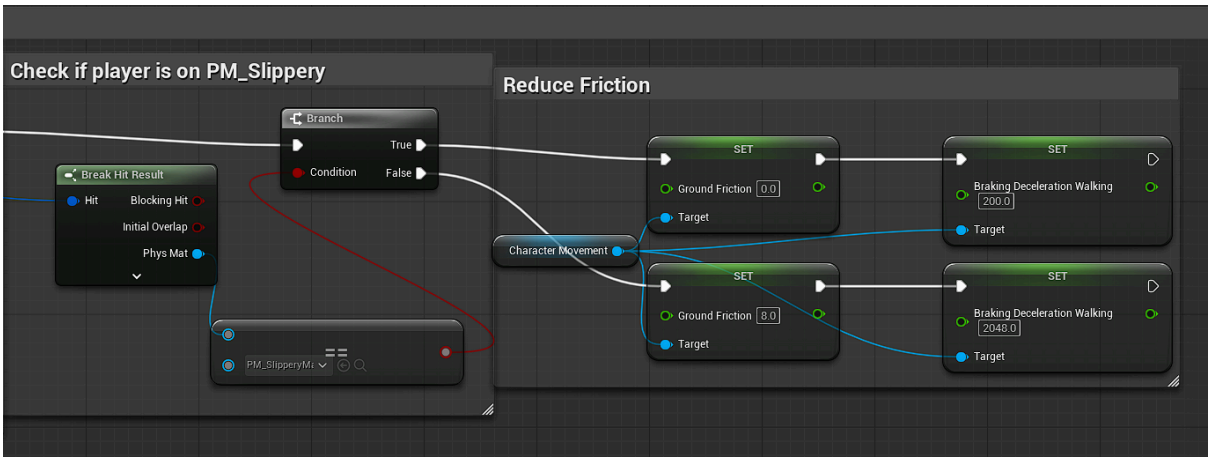

- Physical Material that can be attached to materials to make slip

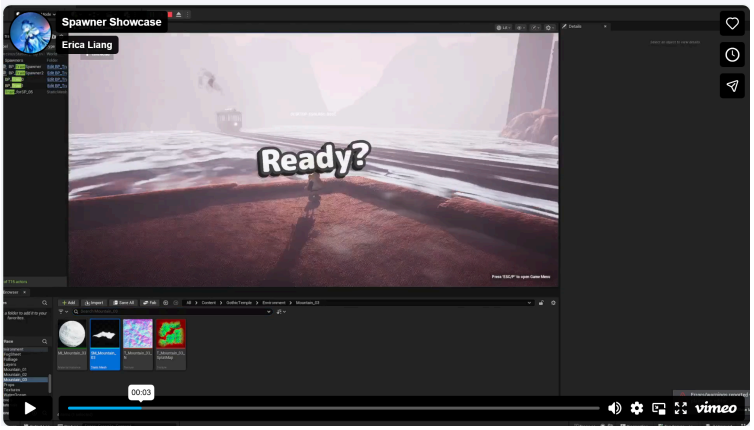

Showcase Video

BP:

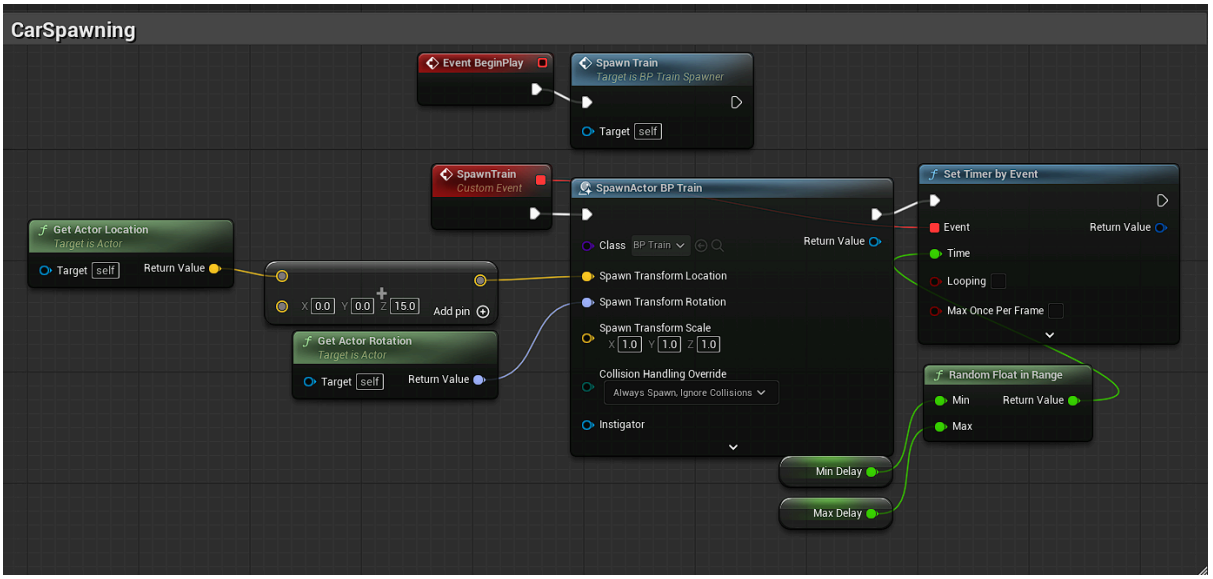

Car/Train/Gear Spawners

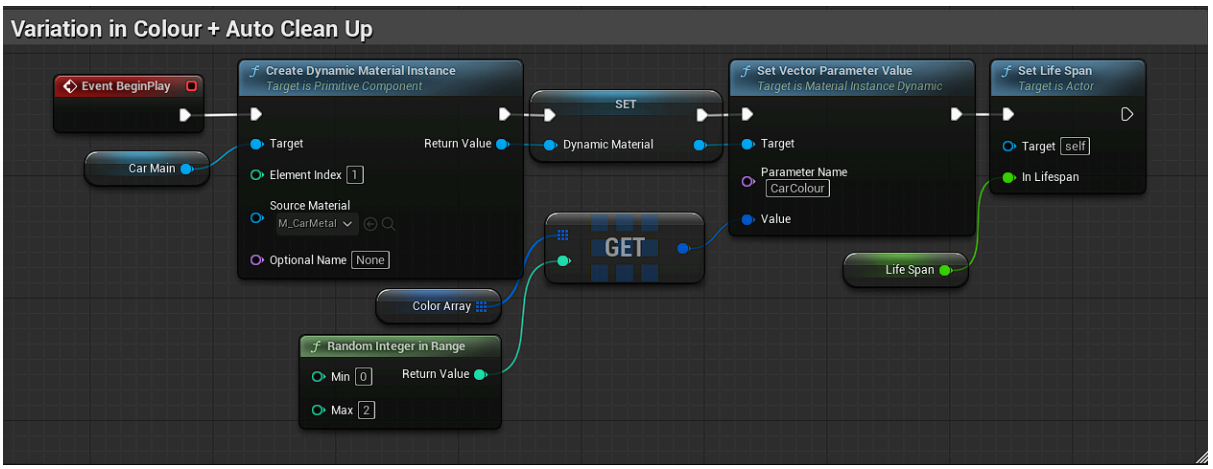

Showcase Video

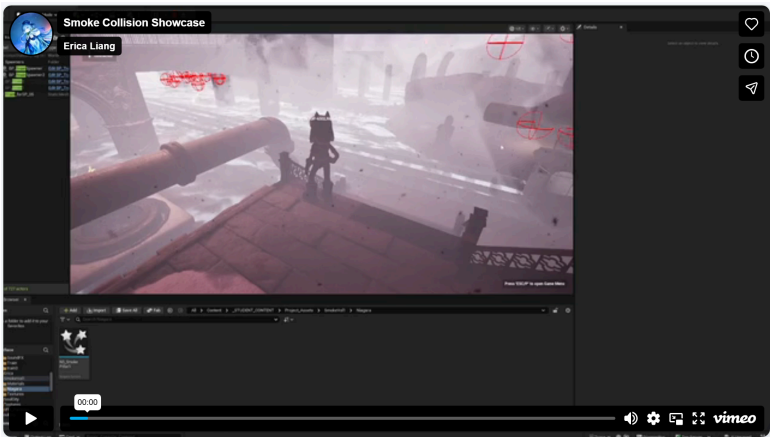

BP:

Car Variation in Colour when spawn:

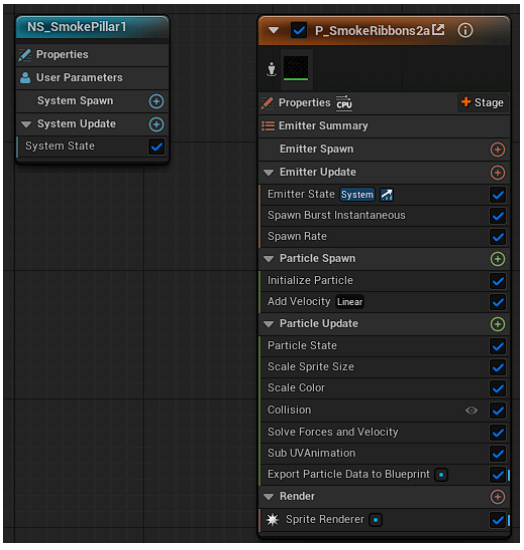

Train Smoke Niagara Collision

Showcase Video

BP:

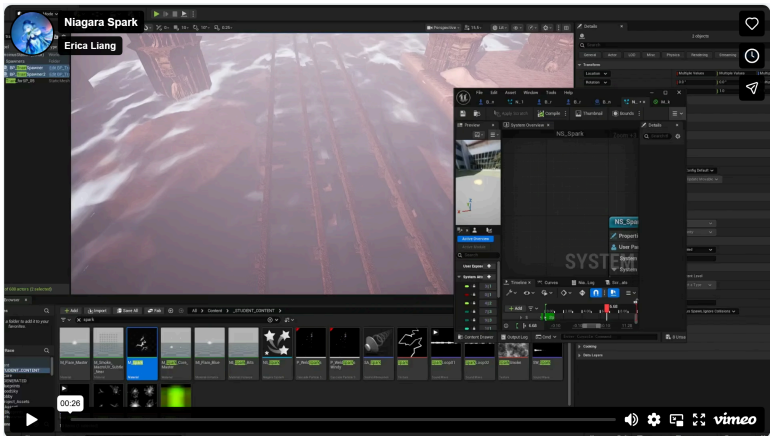

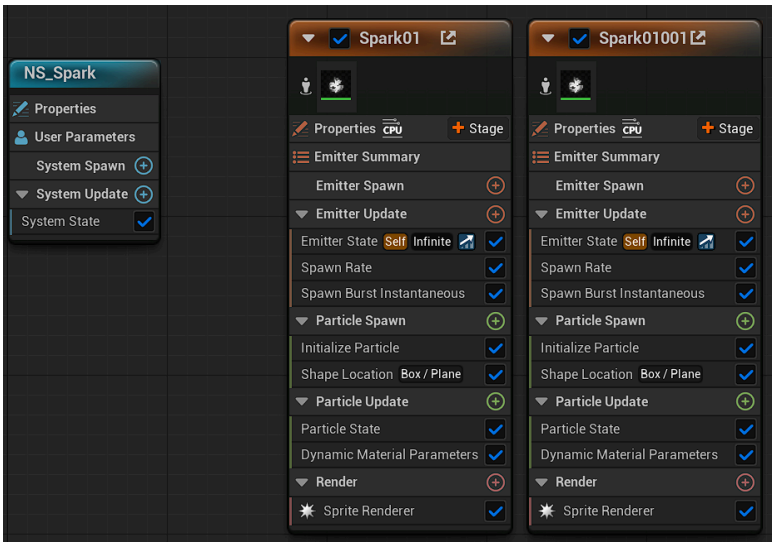

(Smoke Material was from FAB)

Water Spark Niagara System

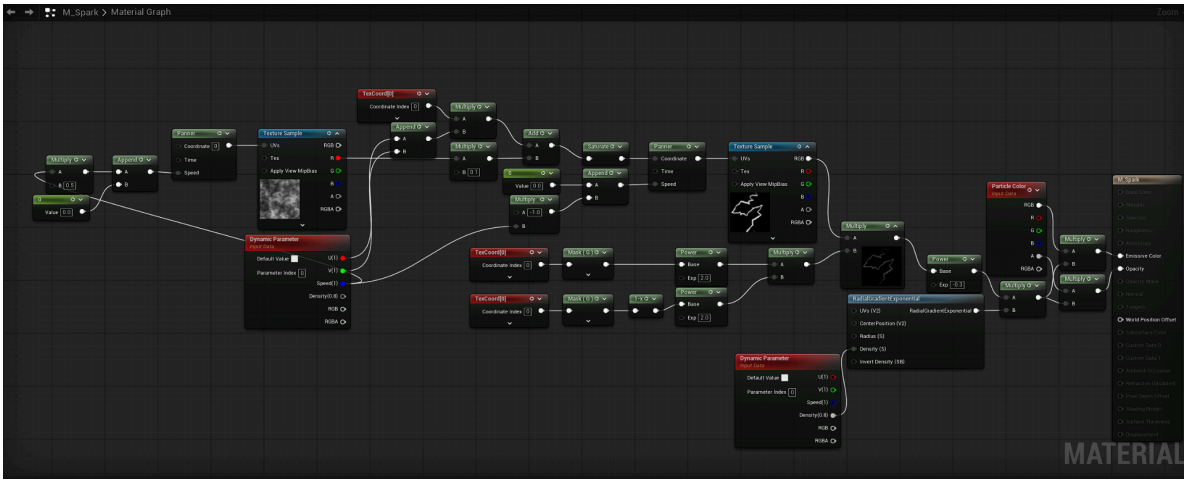

- sparks on water indicating that the water is dangerous

Lobby Screen, Logo, Banner Pics

Our group never got the lobby to game character transition working…
Character selection in the lobby is working, but doesn't transfer to the character index in game, so I just randomize the characters you can play in game for now
